Profile

Driven and results-oriented IT professional with a passion for leveraging technology to optimize business operations and enhance productivity. Seeking opportunities to utilize my skills and expertise in [specific area of IT] to contribute to the success and growth of a dynamic organization.

Project

Feb 2024—Present link
Facial Landmark Detection:
Facial landmarks are key points on a face, such as eyes, nose, and mouth corners, used in facial recognition, expression analysis, and augmented reality. They enable precise identification and manipulation of facial features in applications like face detection, emotion recognition, and virtual makeup.

Chat bot Tester:
Feb 2024 link

A Chat bot Tester is responsible for meticulously evaluating chat bot performance, ensuring seamless interaction, identifying flaws, and enhancing user experience through rigorous testing methodologies.

Quiz Generator link
A quiz generator is a tool that creates customizable quizzes or assessments. Users can input questions, answers, and parameters such as question type and difficulty level. It automatically generates quizzes based on these inputs, facilitating educational or evaluative purposes efficiently.
